PROFESSIONAL SUMMARY

Frontend / Software Engineer with 6+ years of experience building production React, Next.js, and TypeScript applications across enterprise software, ERP, fintech, Web3, and API-driven products. Strong ownership beyond UI: frontend architecture, business logic, REST/HTTP contracts, data-heavy interfaces, RBAC, authentication, complex CRUD workflows, production migrations, debugging, and deployment. Languages: Turkmen C2, Russian C2, English C1, French B1, German B1. Experienced with international and distributed teams.

CORE SKILLS

Frontend: React, Next.js, Next.js App Router, TypeScript, JavaScript, TanStack Query, TanStack Table, Redux, Zustand

UI & Forms: Tailwind CSS v4, shadcn/ui, React Hook Form, Zod, Framer Motion, Responsive UI

Architecture & Integration: REST APIs, HTTP API contracts, SSR, ISR, authentication, sessions, RBAC, file uploads, server pagination/filtering/sorting, URL state

Backend / Data: NestJS, Prisma, PostgreSQL, GraphQL, Hasura, Firebase

Infrastructure / Platforms: Docker, Linux, Nginx, Git, Vercel, Telegram Web Apps, Web3, WalletConnect, TronLink, PWA

SELECTED ENTERPRISE ENGINEERING EXPERIENCE

Frontend / Software Engineer | Multi-module Enterprise ERP (NDA)

Production system | Remote | International team | Enterprise software, ERP, Fintech, SaaS

- Led frontend migration from a legacy UI/API architecture to Next.js, TypeScript, Tailwind CSS v4, shadcn/ui, TanStack Query/Table, React Hook Form, and Zod, covering both UI and HTTP/data-contract work without stopping the production system.
- Migrated Warehouse, HR, Projects, Tasks, Users/Roles/Permissions, Office/document workflows, Finance, and Self-service to the new ERP API; Warehouse spans 16+ operational areas and HR includes 20+ employee-dossier sections.
- Eliminated a large legacy UI surface: migration started with 135 MUI importers, 59 MUI icon importers, and 31 DataGrid files; migration gates reached MUI-zero and DataGrid-zero.
- Audited 13/13 Finance domains and identified 46 incorrect frontend API contracts, 22 missing scenarios, and 8 P0 issues before production cutover across invoices, estimates, payments, expenses, recurring operations, reports, and transactions.
- Reworked localization architecture by moving ~420 hardcoded UI strings into 22 namespaces / 951 translation keys and removing legacy i18next dependencies.
- Resolved a production routing regression that could send ERP traffic to the legacy Nest backend under invalid URL configuration; added configuration safeguards. Regression gates reached 710 passing tests; an earlier milestone passed 682 tests across 160 files plus typecheck, build, and API-contract checks.

PROFESSIONAL EXPERIENCE

Frontend Developer (Middle) | ITDEAL | Jul 2024 - Mar 2026

Remote | Distributed team | Fintech, Web3, Telegram products

- Developed and maintained React/TypeScript applications with REST API integrations, including authentication and transactional user flows.
- Built Telegram WebApp interfaces connected to Bot API and backend product flows; implemented wallet UX with WalletConnect and TronLink for Tron/Ethereum balances, transactions, and token approvals.
- Integrated AML and blockchain checks into frontend journeys and refactored legacy modules to reduce technical debt and improve architectural stability.

Program Manager / Mentor (Programming) | KIBERone | Apr 2022 - Feb 2024

Ashgabat, Turkmenistan | Education / Programming

- Taught programming and web development to 100+ students and supported 40+ students with admission to IT-focused universities; covered HTML, CSS, JavaScript, algorithms, backend basics, and beginner game development.

Frontend Developer (Middle) | Turkmen Forum | Dec 2021 - Jan 2023

Ashgabat, Turkmenistan | Event platforms / Internal admin UI

- Built production frontend layouts, UI elements, and parts of internal admin interfaces using HTML, CSS, JavaScript, and jQuery; also supported event-related IT operations.

Junior Frontend Developer / React Developer | Milli San | Feb 2020 - Dec 2021

Ashgabat, Turkmenistan | Web applications

- Built and fixed responsive pages, contributed to migration from React class components to functional patterns, and worked with TypeScript, GraphQL, Hasura, and Docker integrations.

EDUCATION

Bachelor's Degree - Information Systems and Technologies (Logistics): Institute of Telecommunications and Informatics of Turkmenistan | Graduated 2025
